Report No. 20 ◆ September 1999

Genetic Resources Conservation Program

Division of Agriculture and Natural Resources
University of California
Davis, California USA

This report is one of a series published by the University of California Genetic Resources Conservation Program (technical editor: P.E. McGuire) as part of the public information function of the Program. The Program sponsors projects in the collection, inventory, maintenance, preservation, and utilization of genetic resources important for the State of California as well as research and education in conservation biology. Further information about the Program may be obtained from:

Table of Contents

Preface	vii	Chapter 5: Genetic stocks: Current resources and recent losses	31
Executive Summary	ix	Survey method	
Avian Genetic Resources Task Force Members	xvii	Results from the survey	
Charge to the Task Force	xviii	Lost stocks	
Chapter 1: Introduction	1	Trends in poultry genetics stock development and conservation	
Chapter 2: Avian genetic diversity: Domesticated species	5	Chapter 6: An Avian Genetic Resources System: Proposal	39
Target species		Task Force recommendation	
Types of genetic stocks		Rationale	
Research genetic stocks		Components of an Avian Genetic Resources System (AVGRS)	
Commercial stocks		Facilities and organizational aspects of AVGRS	
Fancy breeds and mid-level production stocks		Financing the AVGRS	
Chapter 3: Avian genetic resources for biological research	15	References	47
Avian reproductive biology		Appendix 1: Instructions and survey form sent to researchers	55
Embryology		Appendix 2: Genetic stock collection data	57
Models for human genetic diseases		Description of stock categories	
Immunogenetics		Notes on specific fields	
Cytogenetics		Disclaimer	
Genomics			
Developmental genetics			
Chapter 4: Conserving avian genetic resources	25		
Methods of conservation of genetic stocks			
Live animals			
Semen cryopreservation			
Blastodisc cryopreservation			
Primordial germ cell cryopreservation			

List of boxes

- | | |
|--|---|
| 1. Commercial value of the poultry industry 1 | 12. Small renaissance of old-style chicken breeds 14 |
| 2. Dispersal of a genetically significant poultry collection 2 | 13. Inherited muscular dystrophy of the chicken 16 |
| 3. Collections at risk: University of California–Davis 2 | 14. Deep pectoral myopathy: One price of intensive selection 18 |
| 4. Successful conservation of at-risk genetic stocks 3 | 15. Ancona chickens give a new angle on disease resistance 19 |
| 5. Parthenogenetic turkeys 6 | 16. Government involvement in genome research 20 |
| 6. Research with goose breeds in Canada 8 | 17. Patterns in vertebrate limb development 22 |
| 7. Highly inbred stocks in immunogenetics 9 | 18. Patterns in skin development 24 |
| 8. Chicken chromosome rearrangement stocks 10 | 19. Mosaic chickens and genetic stock preservation 28 |
| 9. Economics of sex-linked genes and chicken genetics 11 | 20. Orphaned CFAR stocks preserved as frozen embryonic cells 29 |
| 10. Development of egg-laying stocks 12 | 21. The Jackson Laboratory model for vertebrate genetic stocks 36 |
| 11. Development of meat-producing stocks 13 | 22. Japanese quail at the University of British Columbia 37 |

List of figures

ES1 Components of the Avian Genetic Resources System	xii	9. Silkie rooster from UCD Silkie	14
1. Red Jungle Fowl rooster from UCD 001	5	10. Chromosomes from a Red Jungle Fowl hen from UCD 001	19
2. White Leghorn rooster from UCD 003	6	11. <i>Wingless-2</i> chicken embryo from UCD <i>Wingless-2</i> X 331	21
3. Flock with different turkey breeds	6	12. <i>Eudiplopodia</i> embryo foot from UCD <i>Eudiplopodia</i> X 003	22
4. Japanese quail <i>silver</i> mutation from UBC SI	7	13. Hens from UCD <i>Scaleless-Low</i>	24
5. Japanese quail <i>porcupine</i> mutation from UBC PC-WB	7	14. Stage X blastodisc (at time of oviposition)	27
6. White Leghorn hen	12	15. Diagram of avian blastodisc cryopreservation and recovery	28
7. Traditional broiler-type chicken carcass of the 1940s	13	16. Components of the Avian Genetic Resources System	40
8. Commercial Large White turkey tom ..	13		

List of tables

ES1 Estimated costs of Avian Genetic Resources System	xv	4. Estimated costs of Avian Genetic Resource System	45
1. Summary by category of existing poultry genetic stocks (live and cryopreserved)	32	Appendix 2	
2. Number of poultry genetic stocks kept as live birds in institutions in the USA and Canada in 1998, and the number lost since 1984	34	2.0. Stock categories	57
3. Summary by category and species of poultry genetic stocks reported lost since 1984	35	2.1. Stock information. Separate pagination following	60
		2.2. Stocks listed by country, state or province, institution, and curator. Separate pagination following	60
		2.3. Curator contact information. Separate pagination following	60
